

Please do not lift the mandate preventing a Tv station owning the local paper. This would be the best thing for big corporate media but the worst thing for America. It is bad enough that the FCC has allowed Corporate media to get the size it is now...but if TV swallows up the newspapers we will only get our info from one or two sources, which could greatly limit our information resources and enable corporations and government to have greater control over the public by limiting what info they are allowed to receive!! The FCC is supposed to protect the public not the corporations!!

Sincerely,
Travis
